John Kruse

Student at University of Denver - University College
Colorado Springs, Colorado

Summary

Full-stack web developer with extensive background as a magnetic resonance imaging technologist. Not long ago, I retired from the healthcare industry after 25 rewarding years. Wanting to remain in a technical field, and knowing I have a lot to contribute, I began exploring computer programming as this has always piqued my interest. After extensive research, I decided to enroll in a full-stack web development program offered at Denver University.
